Name: $\qquad$ Student ID: $\qquad$

## Prob. 1

Determine Rs so that the following source follower has the drain current of 1 mA . $\mathrm{V}_{\mathrm{DD}}=1.8 \mathrm{~V}$ and $\mathrm{R}_{\mathrm{G}}=50 \mathrm{k} \Omega . \mathrm{M}_{1}$ has $\mathrm{u}_{\mathrm{n}} \mathrm{C}_{0 x}=100 \mu \mathrm{~A} / \mathrm{V}^{2}, \mathrm{~W} / \mathrm{L}=80, \mathrm{~V}_{\mathrm{TH}}=0.5 \mathrm{~V}, \lambda=0$.

## Prob. 2

Determine numerical values for the small-signal voltage gain, inut resistance, and output resistance of the circuit shown in Prob. 1.

## Prob. 3

Determine the small-signal voltage gain of the following cascaded amplifier. Assume both transistors are in saturation, do not suffer from channel-length modulation, their transconductaces are $\mathrm{g}_{\mathrm{m} 1}, \mathrm{~g}_{\mathrm{m} 2}$, and the current source is ideal.
