## Quiz for Lesson 6,7

Sept. 15, 2015
Electronic Circuits 1
Prof. Woo-Young Choi
Name: $\qquad$ Student ID: $\qquad$
Prob. 1
We want to determine $i_{D}, v_{D}, v_{O}$ in the circuit shown below. Assuming $v_{I}$ and $R$ are known as well as $I_{S}$, the saturation current for the diode, and $V_{T_{1}}$, the thermal voltage, list three independent equations that involve $i_{D}, v_{D}, v_{o}$.

## Prob. 2

Plot $v_{O}$ vs $v_{I}$ for the circuit shown above using the ideal diode model.

Prob. 3
Determine $I$ and $V$ in the following PN junction diode circuits using the constant voltage drop model with $\mathrm{V}_{\mathrm{D}, \text { on }}=0.7 \mathrm{~V}$.
(a)

(b)

For the following problems, use the constant voltage drop model with $V_{D, \text { on }}=0.7 \mathrm{~V}$.

Prob. 4
Plot $v_{O}$ vs $v_{I}$ for the following PN junction circuit.

## Prob. 5

Determine the expression for $I_{R}$ (the current flowing through R into the didoes) as a function of $v_{I}$ in the circuit shown above.

## Prob. 6

Assume $v_{I}(\mathrm{t})=\mathrm{V}_{0} \sin (2 \pi \mathrm{ft})$ with $\mathrm{V}_{0}=1 \mathrm{~V}, \mathrm{f}=1 \mathrm{KHz}$.
Plot $v_{I}(\mathrm{t})$ from $\mathrm{t}=0$ to $\mathrm{t}=1 \mathrm{msec}$.
